OUR OFFER!

CHARGING STATIONS

FOR ANY NEED

evway represents the electric mobility for two-, three- and four-wheeled vehicles: e-bikes, electric scooters, motor-bikes and cars.

SMART

Compact, reliable, easy to use and with high-tech connectivity systems: **evway** charging stations are integrated in the digital platform and completely interoperable.

IN CONFORMITY WITH THE STANDARDS

The activation trough the App, the interlocked sockets and the presence sensors guarantee safety in compliance with the regulations.

WARRANTY

The 36-months-warranty plus the RCT-insurance cover offer the security of a product which is made to last.

FOR ELECTRIC CARS

evway charging station with single or double type 2 sockets, power settable from 3,7 to 22 kW, AC modality, mono or three-phase; it can be installed inside or outside, on the wall or on a support. and it's compatible with any car and motorbike

FOR E-BIKES AND SCOOTERS

evway charging station with four Shuko-sockets and a total power of 2 kW, combined with the bicycle stand or the rack. It is installed on the ground and charges e-bikes, scooters and motorcycles.

PROMOTION

IMMEDIATE VISIBILITY

On the **evway** map a specific marker allows to identify immediately the facilities that have a charging station. The interoperability increases visibility in the whole of Europe and on the navigation devices.

DIRECT CONTACT WITH THE CLIENT

A promotional page on the **evway** App and Website allows to manage the relationship with the customers in complete autonomy, thanks to immediate call-to-action tools.

SOCIAL & TOURISM

Each facility is present in **evway** touristic tours and promoted on the social networks and through our newsletter for the ev-Drivers.

PLATFORM MANAGEMENT

CUSTOMER PROFILING

The charging management through the **evway** App allows to profile the electric customers and therefore to launch promotional and direct marketing actions.

PARAMETERS UNDER CONTROL

The platform allows the manager to control at any time exhaustive reports about costs, accesses, delivered charges and payments.

SERVICE AND TECHNICAL ASSISTANCE

No worries at all for the manager: the efficiency of the station is always guaranteed thanks to the remote control of diagnostics, assistance and firmware upgrades.

Choose the marker that best suits your facility and welcome the **Electric Drivers** from all around the world!

Manage your promotional page independently and communicate directly and easily with your **clients!**
